Blad Impact Labs 2026 · Pitch Deck

Hands-on nature education & local climate action for Berlin & Brandenburg communities

Moving neighbourhoods from climate worry to collective action: Kitas, schools, families, seniors, and company teams caring for street trees, greening inner courtyards (*Hinterhöfe*), and cooling urban blocks.

CO-FOUNDING TEAM

Faizan Ahmed & Maham Shakil (Berlin)

IMPACT LABS TRACKS

Climate & Environmental Innovation + Social Impact

Vision: Greening Germany, Kiez by Kiez

Pre-Seed Social & Ecological Venture · Pilot 2026/27 in Berlin & Brandenburg

Overheating street trees & courtyards—and a gap in accessible local action

ECOLOGICAL CHALLENGE · BERLIN & BRANDENBURG

1. Drought-stressed street trees & sealed inner courtyards (*Hinterhöfe*)

- Ongoing summer droughts, sandy soils, and sealed asphalt put severe stress on urban street trees and residential courtyards.
- Urban heat islands directly impact vulnerable groups—especially young Kita children and older neighbours—while reducing urban biodiversity.

SOCIAL & EDUCATIONAL CHALLENGE

2. Climate worry without low-barrier, intergenerational action

- **Under-resourced Kitas, public schools & senior groups** lack budget and guided formats for practical outdoor climate and biodiversity education right at their doorstep.
- **Neighbours & families** want to help (as seen in civic initiatives like *Gieß den Kiez*), but often lack structured, community-led activities that connect tree watering, courtyard greening, and learning across generations.
- **Regional companies (SMEs & CSR teams)** look for tangible, local sustainability days beyond abstract carbon offsets.

Three hands-on pillars connecting urban cooling with community education

1 · KITAS, SCHOOLS & SENIORS

Intergenerational Nature & Tree-Care Workshops

Guided outdoor sessions where Kita children, school classes, families, and seniors adopt and water local street trees, identify birds and insects, and share nature knowledge across generations.

2 · YOUTH, ADULTS & KIEZ

Kiez & Courtyard (*Hinterhof*) Citizen Science

Hands-on field sessions measuring surface and air temperatures between shaded tree beds, greened inner courtyards, and sealed asphalt—making urban heat island cooling visible and measurable.

3 · B2B REVENUE ENGINE

Corporate Kiez Impact Days

Paid team-building & ESG action days where Berlin and Brandenburg companies plant pollinator-friendly tree beds (*Baumscheiben*), unseal/green shared courtyards, and cross-finance free community workshops.

Dual-sided market in Berlin & Brandenburg with strong local synergies

COMMUNITY & EDUCATION USERS

Kitas, Schools, Seniors & Hausgemeinschaften

- **~2,900+ Kitas & 800+ schools** in Berlin plus Potsdam/Brandenburg educational institutions seeking BNE (Education for Sustainable Development) formats.
- **Neighbourhood & senior centres** looking for accessible, socially inclusive outdoor group activities.
- **Residential blocks (*Hinterhöfe*)** seeking guidance to green shared courtyards.

PAYING CUSTOMERS (B2B & PUBLIC)

Companies (CSR / HR) & Local Programmes

- **Primary B2B Market:** SMEs, tech companies, and corporate teams in Berlin & Brandenburg booking half-day or full-day *Kiez Impact Days* for team cohesion and local ESG engagement.
- **Secondary Public Co-Financing:** Municipal climate adaptation, Quartiersmanagement, and environmental education programmes.

ECOSYSTEM & DIFFERENTIATION

Complementary to Civic & EdTech Players

- **Civic Tech (e.g., *Gieß den Kiez*):** Maps trees digitally; **Blad** activates the human, educational, and group routine on the ground.
- **School Gardens (e.g., *Acker e. V.*):** Focuses on vegetable farming on dedicated plots; **Blad** works directly with **existing street trees & inner courtyards** right outside any doorstep—needing zero extra land.

Addressing 4 UN SDGs across Environmental, Social & Economic dimensions

SDG 11 · Sustainable Cities

Cooler, Resilient Neighbourhoods

Environmental & Social: Greening inner courtyards (*Hinterhöfe*) and caring for street trees reduces local heat-island stress and improves shared public/residential space quality.

SDG 13 · Climate Action

From Climate Worry to Local Action

Environmental & Educational: Hands-on microclimate measurement and summer tree watering build practical climate adaptation literacy across all age groups.

SDG 4 & 10 · Inclusive Education

Equal Access Across Generations

Social Dimension: Cross-financing ensures under-resourced Kitas, public schools, and senior groups participate 100% free of charge, reducing educational and social isolation.

SDG 15 · Life on Land

Urban Biodiversity & Pollinators

Ecological & Economic: Corporate teams and neighbours plant native perennials in tree beds (*Baumscheiben*) and install insect habitats, creating measurable urban biodiversity stepping stones.

Self-sustaining hybrid model: Corporate Impact Days fund free Kiez education

REVENUE STREAM 1 · EARNED B2B

Paid Corporate Kiez Impact Days

- Half-day or full-day guided team events for companies in Berlin & Brandenburg (15–40 employees per session).
- Includes materials (native plants, soil, watering gear, insect hotel kits), expert facilitation, and a local neighbourhood impact summary.
- **Role in model:** Primary earned-revenue engine that directly cross-subsidizes free community workshops.

REVENUE STREAM 2 · PUBLIC & GRANTS

Climate, Education & Kiez Grants

- Targeted public funding from neighbourhood funds (*Quartiersmanagement*), urban climate adaptation programmes, and environmental education foundations.
- Co-funding partnerships with housing associations (*Wohnungsbaugesellschaften*) for *Hinterhof* greening & tenant workshops.

SOCIAL IMPACT DELIVERY

100% Free for Under-Resourced Groups

- Every paid Corporate Kiez Impact Day co-finances free workshops for Kitas, public schools, and senior groups in the same neighbourhood.
- **Planned Legal Structure (to be finalized in Impact Labs):** gUG (haftungsbeschränkt) / gGmbH or hybrid social enterprise.

Pre-seed foundation ready for structured B2B & community testing

COMPLETED PRE-SEED BUILDING BLOCKS

1. Workshop Concept & Bilingual Web Prototype

- **Modular 3-Pillar Format Designed:** Age-adapted outdoor modules for (a) Bird & insect identification, (b) Street tree care & *Baumscheiben* planting, and (c) Courtyard/street microclimate temperature mapping.
- **Bilingual Web Prototype Live (EN/DE):** Accessible, zero-cookie platform built to onboard community members, Kitas/schools, and corporate Kiez Impact Day partners.
- **Pre-Incorporation Stage:** Not yet legally incorporated—100% aligned with Impact Labs' pre-seed requirement.

PROBLEM-SOLUTION VALIDATION

2. Grounded in Proven Berlin & Brandenburg Demand

- **Validated Civic Demand:** Builds directly on Berlin's strong citizen tree-watering movement (*Gieß den Kiez*) and municipal heat-action priorities by adding guided, social group formats.
- **Next Validation Focus:** Structured interviews with Kita/school educators, senior neighbourhood centres, housing courtyard initiatives, and CSR/HR leads across Berlin and Potsdam.

How we will use the 3-month Impact Labs programme

NOV – DEC 2026 · IMPACT LABS PART 1

1. Impact Logic & Stakeholder Validation

- Refine our **Impact Business Model Canvas** and Theory of Change with Potsdam Transfer coaches.
- Conduct 15+ structured discovery interviews with Kitas, schools, senior groups, and CSR teams in Berlin & Potsdam.
- Define measurable KPIs (surface temperature delta, trees/courtyards cared for, participant diversity).

JAN – FEB 2027 · IMPACT LABS PART 2

2. B2B Testing, Pricing & Legal Setup

- Use Impact Labs' **B2B Testing & Demo sessions** to validate and price our Corporate *Kiez Impact Day* packages with partner companies.
- Finalize financial plan, legal structure (gUG/gGmbH), and grant applications.
- Pitch at **Match for Impact** to secure pilot partners for Spring 2027.

SPRING – AUTUMN 2027 · PILOT LAUNCH

3. First Kiez Pilots in Berlin & Brandenburg

- Deliver first paid corporate *Kiez Impact Days* and cross-financed free Kita/school/senior workshops during the 2027 growing & watering season.
- Publish first neighbourhood microclimate & social impact evaluation report.

Berliners united by a mission to help green Germany —starting in our Kieze

CO-FOUNDER · STRATEGY, PARTNERSHIPS & OPERATIONS

Faizan Ahmed

Based in Berlin. Initiated Blad with a clear mission to help green Germany from the neighbourhood level up. Leads venture development, B2B corporate *Kiez Impact Day* partnerships, local stakeholder outreach, and digital/operational execution.

✓ Full commitment to all 12 workshop days in Potsdam, Zoom coaching, and Selection Day (Oct 15, 2026).

CO-FOUNDER · COMMUNITY, CURRICULUM & SOCIAL IMPACT

Maham Shakil

Based in Berlin. Co-founded Blad to connect urban environmental action with inclusive, intergenerational learning. Leads community engagement across Kitas, schools, families, and senior groups, workshop format design, and social impact evaluation.

✓ Full commitment to all 12 workshop days in Potsdam, Zoom coaching, and Selection Day (Oct 15, 2026).

Why Impact Labs at the University of Potsdam?

We combine strong founder commitment and a concrete local concept with the desire to build a rigorous social business model alongside Potsdam Transfer's mentors and regional partners (such as Acker Impact).

Berlin & Brandenburg · 2026/27
