Blad Impact Labs 2026 · Pitch Deck

Hands-on nature education & local climate action for Berlin & Brandenburg communities

Moving neighbourhoods from climate worry to collective action: Kitas, schools, families, seniors, and company teams caring for street trees, greening inner courtyards (*Hinterhöfe*), and cooling urban blocks.

CO-FOUNDING TEAM

Faizan Ahmed & Maham Shakil (Berlin)

IMPACT LABS TRACKS

Climate & Environmental Innovation + Social Impact

Vision: Greening Germany, Kiez by Kiez

Pre-Seed Social & Ecological Venture · Pilot 2026/27 in Berlin & Brandenburg

Overheating street trees & courtyards—and a gap in accessible local action

ECOLOGICAL CHALLENGE · BERLIN & BRANDENBURG

1. Drought-stressed street trees & sealed inner courtyards (*Hinterhöfe*)

- Ongoing summer droughts, sandy soils, and sealed asphalt put severe stress on urban street trees and residential courtyards.
- Urban heat islands directly impact vulnerable groups—especially young Kita children and older neighbours—while reducing urban biodiversity.

SOCIAL & EDUCATIONAL CHALLENGE

2. Climate worry without low-barrier, intergenerational action

- **Under-resourced Kitas, public schools & senior groups** lack budget and guided formats for practical outdoor climate and biodiversity education right at their doorstep.
- **Neighbours & families** want to help (as seen in civic initiatives like *Gieß den Kiez*), but often lack structured, community-led activities that connect tree watering, courtyard greening, and learning across generations.
- **Regional companies (SMEs & CSR teams)** look for tangible, local sustainability days beyond abstract carbon offsets.

Three hands-on pillars connecting urban cooling with community education

1 · KITAS, SCHOOLS & SENIORS

Intergenerational Nature & Tree-Care Workshops

Guided outdoor sessions where Kita children, school classes, families, and seniors adopt and water local street trees, identify birds and insects, and share nature knowledge across generations.

2 · YOUTH, ADULTS & KIEZ

Kiez & Courtyard (*Hinterhof*) Citizen Science

Hands-on field sessions measuring surface and air temperatures between shaded tree beds, greened inner courtyards, and sealed asphalt—making urban heat island cooling visible and measurable.

3 · B2B REVENUE ENGINE

Corporate Kiez Impact Days

Paid team-building & ESG action days where Berlin and Brandenburg companies plant pollinator-friendly tree beds (*Baumscheiben*), unseal/green shared courtyards, and cross-finance free community workshops.

Defined Berlin–Brandenburg market size, B2B2C structure & differentiation

1 · TARGET MARKET & SIZE

Berlin & Brandenburg (SAM)

- **B2B Paying Market:** ~10,000+ SMEs, tech firms & corporate teams in Berlin–Brandenburg seeking local ESG/CSR action days & team events.
- **Community & Education Users:** ~2,900+ Kitas, 800+ schools, senior centres & residential courtyard communities (*Hausgemeinschaften*) needing accessible climate & nature formats.

2 · MARKET STRUCTURE

Dual-Sided B2B2C Impact Model

- **Primary B2B Buyers (HR / CSR / Sustainability Leads):** Book turnkey half-day or full-day *Corporate Kiez Impact Days*.
- **Public & Housing Co-Funders:** Quartiersmanagement, climate adaptation funds & housing associations (*Hinterhof* greening).
- **Beneficiaries:** Kitas, schools & senior groups participate 100% free.

3 · COMPETITION & DIFFERENTIATION

How Blad Stands Apart

- **vs. Civic Tech (*Gieß den Kiez*):** Digital map only; **Blad** provides guided on-site workshops & intergenerational community action.
- **vs. School Gardens (*Acker e. V.*):** Requires dedicated garden plots; **Blad** uses **existing street trees & inner courtyards** right outside any doorstep.
- **vs. Generic Team Events:** Blad delivers measurable local cooling & social impact.

Addressing 4 UN SDGs across Environment, Society & Economy

1 · Environment · SDG 13 & 15

Climate Action & Biodiversity

Ecological Dimension: Watering drought-stressed street trees, planting pollinator-friendly tree beds (*Baumscheiben*), and unsealing/greening inner courtyards (*Hinterhöfe*) to cool urban heat islands.

2 · Society · SDG 4 & 10

Quality Education & Inclusion

Social Dimension: Free, low-barrier outdoor workshops bringing together Kita children, public schools, families, and seniors—reducing educational inequality and social isolation.

3 · Economy · SDG 11 & 8

Sustainable Cities & B2B Value

Economic Dimension: A financially self-sustaining social business where regional companies invest in local neighbourhood resilience (*Kiez Impact Days*) instead of distant offsets.

Impact Measurement

Core Impact Metrics

- Surface temperature delta (°C) in courtyards/tree beds
- # of street trees & *Hinterhöfe* cared for
- # of free Kita, school & senior participants reached

Self-sustaining hybrid model: Corporate Impact Days fund free Kiez education

REVENUE STREAM 1 · EARNED B2B

Paid Corporate Kiez Impact Days

- Half-day or full-day guided team events for companies in Berlin & Brandenburg (15–40 employees per session).
- Includes materials (native plants, soil, watering gear, insect hotel kits), expert facilitation, and a local neighbourhood impact summary.
- **Role in model:** Primary earned-revenue engine that directly cross-subsidizes free community workshops.

REVENUE STREAM 2 · PUBLIC & GRANTS

Climate, Education & Kiez Grants

- Targeted public funding from neighbourhood funds (*Quartiersmanagement*), urban climate adaptation programmes, and environmental education foundations.
- Co-funding partnerships with housing associations (*Wohnungsbaugesellschaften*) for *Hinterhof* greening & tenant workshops.

SOCIAL IMPACT DELIVERY

100% Free for Under-Resourced Groups

- Every paid Corporate Kiez Impact Day co-finances free workshops for Kitas, public schools, and senior groups in the same neighbourhood.
- **Pre-Registration Status:** Not yet officially registered (planned legal form to be finalized in Impact Labs: gUG / gGmbH).

Validated problem-solution fit & live bilingual prototype ready for pilot

1 · FIRST PROTOTYPE & SOLUTION CONCEPT

Live Bilingual Platform & 3-Pillar Curriculum

- **Live First Prototype (EN/DE):** Public web platform & community onboarding hub live at **faizan021.github.io/blad-berlin/**
- **3-Pillar Workshop Concept:** Ready-to-test outdoor modules for (a) Bird & insect identification, (b) Street tree care & *Baumscheiben* planting, and (c) Courtyard microclimate temperature measurement.
- **Pre-Registration Stage:** Project is not yet officially registered—100% aligned with Impact Labs pre-seed criteria.

2 · PROBLEM-SOLUTION FIT VALIDATION

Validated with Local Users & Civic Momentum

- **User & Community Validation:** Direct exchanges with Berlin neighbours, parents/educators, and workplace teams confirmed strong demand for guided, social outdoor formats that turn climate worry into tangible neighbourhood action.
- **Proven Civic Need:** Builds on validated Berlin demand (e.g., citizen tree watering & *Hinterhof* greening initiatives) by solving the missing link: structured group facilitation & B2B cross-financing.

What we want to achieve during the 3-month Impact Labs programme

NOV – DEC 2026 · IMPACT LABS PART 1

1. Impact Canvas & Partner Validation

- Develop our **Impact Business Model Canvas (IBMC)** / Flourishing Business Canvas with Potsdam Transfer coaches.
- Deepen discovery with 15+ Kitas, schools, senior groups, and CSR teams in Berlin & Potsdam.
- Finalize our Impact Logic & microclimate/social evaluation metrics.

JAN – FEB 2027 · IMPACT LABS PART 2

2. B2B Testing, Pricing & Legal Setup

- Use Impact Labs' **B2B Testing & Demo sessions** to test and price our Corporate *Kiez Impact Day* packages with partner companies.
- Complete financial plan, legal pre-incorporation preparation (gUG/gGmbH), and grant applications.
- Pitch at **Match for Impact** to secure pilot partners for Spring 2027.

SPRING – AUTUMN 2027 · PILOT LAUNCH

3. First Kiez Pilots in Berlin & Brandenburg

- Deliver first paid corporate *Kiez Impact Days* and cross-financed free Kita/school/senior workshops during the 2027 growing & watering season.
- Publish first neighbourhood microclimate & social impact evaluation report.

Complete 2-person founding team officially residing in Berlin, Germany

CO-FOUNDER · STRATEGY, B2B PARTNERSHIPS & OPERATIONS

Faizan Ahmed (Berlin, Germany)

Skillset & Role: Venture strategy, B2B corporate outreach (*Kiez Impact Days*), financial & operational planning, and digital prototype development. Initiated Blad to help green Germany starting from our own neighbourhoods.

✓ Lives officially in Berlin, Germany · ✓ Full time commitment for all 12 workshop days in Potsdam, Zoom sessions & Selection Day (Oct 15).

CO-FOUNDER · COMMUNITY, CURRICULUM & SOCIAL IMPACT

Maham Shakil (Berlin, Germany)

Skillset & Role: Community engagement (Kitas, schools, families, seniors), educational workshop design, stakeholder coordination, and social impact evaluation.

✓ Lives officially in Berlin, Germany · ✓ Full time commitment for all 12 workshop days in Potsdam, Zoom sessions & Selection Day (Oct 15).

100% Qualification Checklist Met for Impact Labs 2026

✓ Complete 2-person team for current phase · ✓ Both founders live officially in Germany (Berlin) · ✓ Not yet officially registered · ✓ Live prototype & validated Problem-Solution Fit · ✓ 4 UN SDGs across Economy, Society & Environment.
